IN EACH PRODUCT, AN INNOVATIVE WOOD SOLUTION

Our goal is to develop wood-inspired solutions that combine industrial, functional, quality and design knowledge. More than just creating wood-based panels, we offer solutions to improve people's lives.

Wood-based panels are the foundation of all we develop and the most sustainable, flexible and functional alternative to real wood. The more efficient use of resources and greater dimensional flexibility allow for adjusted solutions to be created to meet people's needs. Replacing wood with wood-based panels in a growing number of applications, such as office and home furniture, kitchens, bathroom furniture, doors, walls and decorative objects, places our products on the road to sustainability.

Our wood-based products for construction and furniture:

- **Wood particleboard (PB)**, a very versatile product for general use in furniture and the building industry.
- **Medium density fibreboard (MDF)**, an excellent replacement for solid wood and ideal for furniture, flooring and the building industry.
- **Oriented Strand Board (OSB)**, a highly resistant product, suitable for structural and non-structural applications for the building industry.

All our wood boards (PB and MDF) are available with additional properties if necessary, such as fire retardance (FR) or moisture resistance (MR), and fully comply with the strictest formaldehyde emission standards, are environmentally sustainable and eco-friendly.

Innovus is a Sonae Arauco brand that comprises all the solutions you need for your indoor decorative projects. Find inspiration in our décor range of Melamine (MF), High Pressure Laminates (HPL) and Compacts (HPL C) and choose the ones that best suit your ideas from our selection.

Discover in our collections the special detail or the performance feature that will guarantee the safety or comfort you're looking for.

Be surprised with our Innovus Essence, with the look and feel of real wood, in a wide range of decorative designs, with exciting new ideas being introduced in this catalogue.

Explore all the potential of our Innovus coloured MDF - we've taken medium density fibreboard (MDF) to another level and added colour, depth and all of Sonae Arauco's know-how in the decorative area for your boldest and most innovative projects.

We proudly welcome you to the Innovus world and its new ideas - we're certain that you'll find the decorative design you're looking for and sincerely hope you'll find even more inspiration in the pages to follow.

POUR CHAQUE PRODUIT, UNE SOLUTION EN BOIS INNOVANTE

Notre objectif est de développer des solutions inspirées dans le bois qui allient la connaissance industrielle, la fonctionnalité, la qualité et le design. Plus que créer des produits se basant sur des panneaux dérivés du bois, nous offrons des solutions qui améliorent la vie des personnes.

Les panneaux dérivés du bois sont la base de tout ce que nous développons et l'alternative la plus flexible, durable et fonctionnelle au bois massif. Plus efficaces pour ce qui est de l'utilisation de ressources et avec une plus grande flexibilité dimensionnelle, ils permettent de créer des solutions qui s'ajustent aux besoins des personnes. Le remplacement du bois massif par les panneaux dérivés du bois, en un nombre croissant d'applications, comme le mobilier intérieur et de bureau, les cuisines, les armoires de salles-de-bains, les portes, les murs et les objets de décoration, positionne nos produits en terme de durabilité dans le temps.

Nos produits de base pour le bâtiment et pour le mobilier:

- **Panneaux de particules (PB)**, un produit très polyvalent et indiqué pour la plupart des utilisations des industries du mobilier et du bâtiment.
- **Panneaux de fibres à moyenne densité (MDF)**, une excellente substitution du bois massif, idéale pour le mobilier, pour les sols et pour l'industrie du bâtiment.
- **Panneaux de fibres orientées (OSB)**, un produit très résistant, indiqué pour les applications structurelles et non-structurelles de l'industrie et de la construction bois.

Tous nos panneaux dérivés du bois (PB et MDF) sont disponibles avec des propriétés supplémentaires, comme une meilleure réaction au feu (FR) et à l'humidité (MR), tout

en respectant les exigences environnementales les plus rigoureuses en ce qui concerne les émissions de formaldéhyde, et en étant écologiquement durables et respectueux de l'environnement.

Aussi bien les Panneaux de Particules (PB) que les panneaux de Fibres à Moyenne Densité (MDF) jouent un rôle vital pour nos produits de décoration présentés dans ce catalogue.

Innovus est une marque Sonae Arauco qui offre toutes les solutions dont vous avez besoin pour une utilisation intérieure pour vos projets de décoration. Inspirez-vous de notre gamme décorative de mélamines (MF), stratifiés (HPL) ou compacts (HPL C) et choisissez la meilleure solution pour votre projet.

Découvrez, dans notre vaste collection, les spécificités que vous cherchez ou la caractéristique du comportement qui vous garantit la sécurité et le confort.

Soyez surpris par le côté naturel et réaliste de notre produit qui vous fera penser au véritable bois, au travers des décors et des possibilités de notre Gamme Innovus ESSENCE dont.

Explorez toutes les possibilités de notre gamme Innovus Colour MDF, ou nous avons fait évoluer nos panneaux par l'ajout de la couleur, et ce grâce à toute l'expérience de notre département décoration au sein de SONAE ARAUCO qui ont élaborés ces produits dans le but de rendre vos projets plus innovants et percutants.

C'est avec plaisir que nous vous souhaitons la bienvenue dans le "nouveau" monde Innovus. Nous avons la certitude que vous découvrirez le design décoratif recherché et nous souhaitons que vous trouviez encore plus d'inspiration dans les pages suivantes.

Melamine Panels

Panneaux Mélaminés

Melamine (MF) is a decorative surface applied to one of our raw wood boards (PB or MDF, it's your choice).

Innovus Melamine is a surface suitable for indoor use, easy to clean, with stain and scratch resistant properties, and does not require any special maintenance.

Additional performance features can be added, such as improved reaction to fire (FR) or extra moisture protection (MR), for more demanding applications like bathrooms or kitchens.

All melamine panels are sustainable and environmentally friendly products, complying with EN 14322.

La Mélamine est un revêtement décoratif qui est appliqué postérieurement sur l'un de nos panneaux dérivés de bois (panneau de particules (PB) ou panneau de fibres (MDF)).

Les panneaux mélaminés Innovus présentent de nombreuses gammes et une multitude de possibilités de décoration. Il s'agit d'une surface adaptée aux applications intérieures, facile à nettoyer, résistante aux taches et aux rayures, sans aucune maintenance spéciale.

D'autres propriétés peuvent être ajoutées, comme une meilleure résistance au feu (FR) ou une résistance supplémentaire à l'humidité (MR).

Tous les panneaux mélaminés sont durables et respectueux de l'environnement, selon la norme EN 14322.

Laminates *Stratifiés*

Innovus HPL is a High Pressure Laminate for indoor applications, where design, look, quality, durability and resistance are key for your project's success.

It is a particularly resistant, durable and hygienic product, suitable for use in high impact and wear situations, for both horizontal and vertical applications, in public, commercial and residential areas.

Available in standard, postforming, fire retardant (FR) and MED variants, Innovus HPL combines performance, versatility and exclusivity in furniture and wall cladding, creating exceptional environments.

Innovus laminates meet the most stringent requirements for hygiene, fire, humidity resistance and mechanical properties, according to EN438.

Laminate is a treated, chemically inert material, classified as non-hazardous, so REACH classification is not applicable. It is also environmentally neutral.

Innovus HPL est un stratifié décoratif à haute pression pour applications intérieures, où le design, l'apparence, la qualité, la durabilité et la résistance sont les facteurs-clés pour le succès du projet.

Extrêmement résistant, durable et hygiénique, ce produit est approprié pour une utilisation dans des conditions d'usure extrême, verticales ou horizontales, dans le secteur public, commercial et résidentiel.

Disponible en version Standard, Postformable, Ignifuge et MED, Innovus HPL allie la performance, la polyvalence et l'exclusivité dans la production de mobilier et de revêtements muraux, en créant des ambiances exceptionnelles.

Les stratifiés Innovus répondent aux exigences de la norme EN 438. Les stratifiés sont un matériau traité et donc chimiquement inerte, classés comme non dangereux, raison pour laquelle ils ne sont pas inclus dans la classification REACH. C'est un produit écologiquement neutre.

Compacts

Innovus Compact is a strong, robust, damage resistant product, with remarkable structural stability that responds to the most demanding usage requirements and building regulations.

Compacts are particularly suitable for use in high impact and wear conditions, or with considerable moisture levels. It is freestanding with no additional support needs for thicknesses over 6 mm.

Innovus Compact, standard or fire resistant, with decorative surfaces on both sides, is ideal for cabins, divisions and cupboard doors, wall cladding, interior decoration, furniture and especially on table tops.

Available in white or grey core, it can be milled or engraved to enhance its decorative properties, making it the ideal choice for furniture design and indoor decoration.

Innovus Compact est un produit fort, robuste et résistant aux dommages, présentant une stabilité structurelle remarquable qui répond aux normes d'utilisation les plus exigeantes et à la réglementation du secteur du bâtiment.

Il est particulièrement approprié pour une utilisation dans des conditions d'impact et d'usure élevés, ou des taux d'humidité importants. Autoportant, il ne requiert aucun support pour des épaisseurs supérieures à 6 mm.

Avec ses deux faces décoratives, Innovus Compact, standard ou résistant au feu, est idéal pour les cabines, les cloisons et les portes d'armoire, les revêtements muraux et la décoration d'intérieurs, ainsi que pour le mobilier, notamment les plateaux.

Disponible dans les versions à noyau blanc ou gris, il peut être fraisé ou gaufré pour rehausser ses propriétés décoratives. Il est ainsi le choix idéal pour le mobilier de design et la décoration d'intérieurs.

innovus[®]
Essence

Innovus Essence is a tribute to our passion: wood.

With Innovus Essence we went back to the origins, looking for the textures, look and feel of real wood and recreating it in a melamine surfaced panel with synchronized (EIR) finish.

La gamme Innovus Essence est un hommage à notre passion: le bois.

Avec Innovus Essence, nous revenons aux origines en recherchant les textures et la beauté du bois massif, représentées sur un panneau avec une finition mélaminée synchronisée (EIR).

innovus[®]
Coloured MDF

Medium density fibreboard (MDF) at another level.

Innovus Coloured MDF adds colour to the natural advantages of this well-known wood board.

Carefully combined, Innovus Coloured MDF colours will be the ideal partner for developing new individually tailored concepts for indoor applications, with inspiring depth and warmth in welcoming balanced environments.

Le panneau de fibres à moyenne densité (MDF) est élevé à un autre niveau. Innovus Coloured MDF ajoute de la couleur aux avantages bien connus de ces panneaux en bois. Soigneusement combinés, les panneaux Innovus Coloured MDF sont le partenaire idéal pour développer de nouveaux concepts et projets d'intérieur sur mesure, en apportant de la profondeur à des environnements accueillants, chaleureux et équilibrés.
